

## January 2020 Job Alert

Hey Nicole,

If the cold nights are getting you down, and you don't have a ticket to Jamaica yet, you might be a victim of the mid-winter blues. And while it's tempting to sit by the fire and wait for the groundhog to see his shadow, I wouldn't wait longer than necessary to make a job change.

The job market is still strong, and right now is a tremendous opportunity to get a jump on landing that new job you want and steering your career in the right direction.

Supply and demand are working in your favor. The time to consider making a change and getting a few more perks is staring you in the face.

When you have a moment, take a look at the positions at right. If you're interested, touch base with me to learn more.

Thanks!

- Mike
